Back Steer Right	X	Back Steer Right	Keypad 3

Monster Truck Rumble also supports optional controllers including many steering wheels and game pads. You can customize the keyboard controls and optional controllers by selecting Options, Controls from the Main Menu.

Playing Monster Truck Rumble:

Select the type of event at the Main Menu. Select your driver profile (or create a new driver) then click the arrow in lower right hand corner of the screen.

You can scroll through the trucks by clicking the << and >> above the picture of the truck on the Select Monster Truck menu. You can also choose whether you have an automatic or manual transmission. Click on the arrow in the lower right corner of the screen to proceed.

Select Track to choose the track you want to compete on. Click on the << and >> to scroll through the available tracks. **Note:** Not all tracks are available for each event. Desert Ring and Alley Sands are only available if you select a Lane Race event. After selecting your truck and track, click the arrow in the lower right corner of the screen.

The Ready to Start screen will summarize your game selections. If you wish to modify any of your selections, click the <<< Previous button to return to the track and truck selection menus. You can also change the number of laps in the race and the weather effects on this screen. When all of the options look good, click the arrow in the lower right corner of the screen to start the race.

In the lower left corner of the racing screen is the radar. Your truck is represented by a small white triangle. Your opponents are represented by the other triangles. Checkpoints are represented by blue boxes. In the lower right corner of your screen is your speedometer. In the upper left corner of the screen is your damage indicator. When you reach 0% you are out of the race. In the top center of the screen is a green arrow that points to the next checkpoint. Under the arrow is the distance to the checkpoint. In the upper right corner of the race statistics are displayed. Note: In the "Free Run" mode only radar and speedometer are displayed.

Troubleshooting:

If you are having difficulty running Monster Truck Rumble, ensure that your computer meets the minimum system requirements. Monster Truck Rumble requires a DirectX 8 (or higher) compatible 3D accelerator with a minimum of 8MB RAM. Many problems can be solved simply by updating outdated video and audio device drivers. Drivers are free and available for download from your computer, video card or sound card manufacturer's website. For optimal performance we recommended that you close any other applications that are running on your computer prior to playing Monster Truck Rumble. You can further improve performance by reducing the resolution, color mode and view distance or by turning off the special effects under Graphics in the Options Menu.

Technical Support:

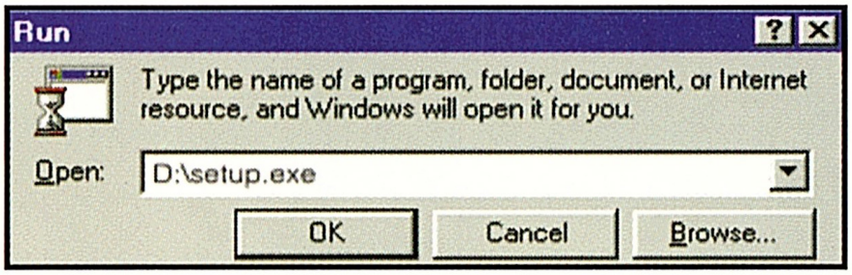
For help installing and software updates, visit our website at **www.valusoft.com**
or e-mail us at **support@valusoft.com**.

Installing Monster Truck Rumble:

Insert the game CD into your CD-ROM drive. If installation does not start automatically, follow these steps:

1. Click on START.

2. Select RUN. 



3. Type D:\SETUP.EXE ("D"=the letter of your CD-ROM drive) and click OK.
4. Follow the on-screen instructions to complete the installation of Monster Truck Rumble.

Running Monster Truck Rumble:

Place the Monster Truck Rumble CD in your CD-Rom drive and click the Play button on the menu. If autorun is disabled, you can start Monster Truck Rumble by double clicking on the Monster Truck Rumble shortcut on your desktop, or by clicking START, RUN, Program Files, Monster Truck Rumble, Monster Truck Rumble. The Monster Truck Rumble CD MUST be in your CD-ROM drive to play.

Main Menu:

- Single Player Event: Compete against computer controlled opponents.
- Multiplayer Event: Compete against another player over a LAN or on the same computer using the split screen mode.
- Scoreboard: Displays the top scores.
- Options: Customize the default game settings.
- Exit: Return to Windows.
- Free Run: Allows you to explore the tracks without any time or damage penalty.
- Circuit Race: Race from checkpoint to checkpoint in the proper order to win the race.
- Wreck 'n Crush: Be the first the crash and crush the wrecks, but be careful not to wreck your truck in the process.
- Lane Race: Compete on a traditional race track.
